“Dr. Diane Powell is a master at communication. Her presentations are extraordinary and her command of science and literature inspiring.”

—**Jim Thompson, computer artist, philosopher, technical illustrator and poet.**

“Your presentation was simply awesome... It was as if you provided the necessary evidence for my thinking. Your presentation conveyed the most difficult concepts and anecdotes in a manner which only refined teachers and accomplished students of truthful knowledge can or have done in my life time. The most adoring part is your western origin of clarity and your eastern sense of belief in consciousness which was perpetually visible all throughout. I feel proud to be a part of that workshop. I thank my Lord Krishna. , my Devine Guruji and my past Karmas which made this even occur for my learning.”

—**Dr Shailesh Pangaonkar, Cons. Psychiatrist & Director, Central Institute of Behavioural Sciences, Nagpur. pangaonkar11@gmail.com**

**As a researcher/innovative thinker:**

“A quiet revolution is occurring within science, in which the origin, destiny, and essential nature of consciousness are being redefined. Dr. Diane Hennacy Powell is at the forefront of these developments.”

— **Larry Dossey, MD, author of *The Power of Premonitions and Healing Words***

“Diane Powell has proposed a model of the Mobius Mind that draws from chaos theory, superstring theory, and various other sources... The result is a tour de force that is more comprehensive and persuasive than anything I have read in years. I suspect it will become a classic piece of work.”

—**Stanley Krippner, Ph.D., co-author, *Extraordinary Dreams and How to Work with Them***
